SUBJECT INDEX OF VOLUME 21

Differential equations

Singular problems and the global element method, J.A. Hendry 21 (1980) 1
Temperature calculations for shell enclosures subjected to thermal radiation, I.G. Currie and W.W. Martin 21 (1980) 75
On the large strain inelastic analysis in natural formulation – Part II. Dynamic problems, J.H. Argyris and J.S. Doltsinis 21 (1980) 91
Nonlinear dynamic analysis of space trusses, A.K. Noor and J.M. Peters 21 (1980) 131
Numerical studies of the performance of an optimally controlled nonlinear stochastic oscillator, W.C. Huisman and Y. Yavin 21 (1980) 171
Numerical solution of a differential equation in fluid mechanics, A.K. Salariya 21 (1980) 211
Large deformation, rigid–plastic dynamics by an extremum principle, H. Stolarski and T. Belytschko 21 (1980) 217
Micropolar beam models for lattice grids with rigid joints, A.K. Noor and M.P. Nemeth 21 (1980) 249
The direct matrix imbedding technique for computing three-dimensional potential flow about arbitrarily shaped bodies, S. Ohring and J. Telste 21 (1980) 315
Thermally induced vibrations of beam structures, G.D. Manolis and D.E. Beskos 21 (1980) 337
The determination of optimum acceleration factors for successive overrelaxation on a rectangular net for inhomogeneous media, E. Sjøntoft and S. Steenstrup 21 (1980) 357

Dynamics

On the large strain inelastic analysis in natural formulation – Part II. Dynamic problems, J.H. Argyris and J.S. Doltsinis 21 (1980) 91
Nonlinear dynamic analysis of space trusses, A.K. Noor and J.M. Peters 21 (1980) 131
Numerical studies in performance of an optimally controlled nonlinear stochastic oscillator, W.C. Huisman and Y. Yavin 21 (1980) 171
Large deformation, rigid–plastic dynamics by an extremum principle, H. Stolarski and T. Belytschko 21 (1980) 217
Thermally induced vibrations of beam structures, G.D. Manolis and D.E. Beskos 21 (1980) 337

Finite difference methods

Temperature calculations for shell enclosures subjected to thermal radiation, I.G. Currie and W.W. Martin 21 (1980) 75

Nonlinear dynamic analysis of space trusses, A.K. Noor and J.M. Peters 21 (1980) 131
Numerical studies of the performance of an optimally controlled nonlinear stochastic oscillator, W.C. Huisman and Y. Yavin 21 (1980) 171
Numerical solution of a differential equation in fluid mechanics, A.K. Salariya 21 (1980) 211
Streamwise computation of duct flows, M.S. Greywall 21 (1980) 231
The direct matrix imbedding technique for computing three-dimensional potential flow about arbitrarily shaped bodies, S. Ohring and J. Telste 21 (1980) 315

Finite element and matrix methods

Singular problems and the global element method, J.A. Hendry 21 (1980) 1
On the large strain inelastic analysis in natural formulation – Part II. Dynamic problems, J.H. Argyris and J.S. Doltsinis 21 (1980) 91
Incremental analysis of axisymmetric shallow shells with varying strain-displacement equations, P. Varpasuo 21 (1980) 153
Computer analysis of elastic–plastic structures, A. Franchi and M.Z. Cohn 21 (1980) 271

Fluid mechanics

Singular problems and the global element method, J.A. Hendry 21 (1980) 1
Numerical solution of the Riemann–Hilbert problem for a vertical jet under gravity, T.H. Lim 21 (1980) 45
Numerical solution of a differential equation in fluid mechanics, A.K. Salariya 21 (1980) 211
Streamwise computation of duct flows, M.S. Greywall 21 (1980) 231
Higher-order axial singularity distributions for potential flow about bodies of revolution, M.F. Zedan and C. Dalton 21 (1980) 295
The direct matrix imbedding technique for computing three-dimensional potential flow about arbitrarily shaped bodies, S. Ohring and J. Telste 21 (1980) 315

Heat and diffusion

Temperature calculations for shell enclosures subjected to thermal radiation, I.G. Currie and W.W. Martin 21 (1980) 75
On the large strain inelastic analysis in natural formulation – Part II. Dynamic problems, J.H. Argyris and J.S. Doltsinis 21 (1980) 91
Streamwise computation of duct flows, M.S. Greywall 21 (1980) 231
Thermally induced vibrations of beam structures, G.D. Manolis and D.E. Beskos 21 (1980) 337

Integral equations

Numerical calculation of eigenvalues of integral operators for plane elastostatic boundary value problems, C.H. Müller and U. Heise 21 (1980) 17

Torsion problem for elastic cylinder with holes, R.D. Bhargava and S.S. Puranik 21 (1980) 63
Numerical studies of the performance of an optimally controlled nonlinear stochastic oscillator, W.C. Huisman and Y. Yavin 21 (1980) 171
Higher-order axial singularity distributions for potential flow about bodies of revolution, M.F. Zedan and C. Dalton 21 (1980) 295

Miscellaneous topics

Singular problems and the global element method, J.A. Hendry 21 (1980) 1
Numerical solution of the Riemann–Hilbert problem for a vertical jet under gravity, T.H. Lim 21 (1980) 45
Numerical studies of the performance of an optimally controlled nonlinear stochastic oscillator, W.C. Huisman and Y. Yavin 21 (1980) 171
Higher-order axial singularity distributions for potential flow about bodies of revolution, M.F. Zedan and C. Dalton 21 (1980) 295
The direct matrix imbedding technique for computing three-dimensional potential flow about arbitrarily shaped bodies, S. Ohring and J. Telste 21 (1980) 315

Nonlinear structural mechanics

On the large strain inelastic analysis in natural formulation – Part II. Dynamic problems, J.H. Argyris and J.S. Doltsinis 21 (1980) 91
Nonlinear dynamic analysis of space trusses, A.K. Noor and J.M. Peters 21 (1980) 131
Incremental analysis of axisymmetric shallow shells with varying strain-displacement equations, P. Varpasuo 21 (1980) 153
Large deformation, rigid–plastic dynamics by an extremum principle, H. Stolarski and T. Belytschko 21 (1980) 217

Optimization

Numerical studies of the performance of an optimally controlled nonlinear stochastic oscillator, W.C. Huisman and Y. Yavin 21 (1980) 171
Complete solutions for a class of elastic–plastic structures, I. Kaneko 21 (1980) 193
Large deformation, rigid–plastic dynamics by an extremum principle, H. Stolarski and T. Belytschko 21 (1980) 217
Computer analysis of elastic–plastic structures, A. Franchi and M.Z. Cohn 21 (1980) 271

Shells and plates

Temperature calculations for shell enclosures subjected to thermal radiation, I.G. Currie and W.W. Martin 21 (1980) 75
On the large strain inelastic analysis in natural formulation – Part II. Dynamic problems, J.H. Argyris and J.S. Doltsinis 21 (1980) 91

Incremental analysis of axisymmetric shallow shells with varying strain-displacement equations, P. Varpasuo 21 (1980) 153

Structural mechanics

Singular problems and the global element method, J.A. Hendry 21 (1980) 1
Numerical calculation of eigenvalues of integral operators for plane elastostatic boundary value problems, C.H. Müller and U. Heise 21 (1980) 17
Torsion problem for elastic cylinder with holes, R.D. Bhargava and S.S. Puranik 21 (1980) 63
Complete solutions for a class of elastic–plastic structures, I. Kaneko 21 (1980) 193
Micropolar beam models for lattice grids with rigid joints, A.K. Noor and M.P. Nemeth 21 (1980) 249
Computer analysis of elastic–plastic structures, A. Franchi and M.Z. Cohn 21 (1980) 271
Thermally induced vibrations of beam structures, G.D. Manolis and D.E. Beskos 21 (1980) 337

Systems of linear and nonlinear simultaneous equations

Numerical calculation of eigenvalues of integral operators for plane elastostatic boundary value problems, C.H. Müller and U. Heise 21 (1980) 17
Nonlinear dynamic analysis of space trusses, A.K. Noor and J.M. Peters 21 (1980) 131
Streamwise computation of duct flows, M.S. Greywall 21 (1980) 231
The determination of optimum acceleration factors for successive overrelaxation on a rectangular net for inhomogeneous media, E. Sjøntoft and S. Steenstrup 21 (1980) 357
